DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

The disclosure is objected to because of the following informalities: page 11, lines 17-18 and page 12, lines 4-5 refers to the reflection portion as element number 15 which contradicts Fig 3.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 4 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Eriguchi (US 5985032).

Re clms 1,4,5: Eriguchi discloses a monitoring apparatus (Fig 15) comprising: a measurement window (40), means for irradiating said measurement window (48) at an incident angle that said measurement light is totally reflected by an inner surface of said measurement window (Col 14 lines 57-65), detection means (44) and means for evaluating the layer deposited on the inner surface of the measurement window on the basis of a detection result of said detection (71).

Allowable Subject Matter

Claims 2,3 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to disclose or suggest a reflection portion and a transmission portion formed on the window in conjunction with the rest of the claimed subject matter.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Zhong et al 6124927, Kawada et al 5536359, Savkar et al 5843232 and Eriguchi 5897378.
